1. Fixed a defect on the screen off function.

2. Add Stop alarm: Telemetry RPM sensor setting
   On the telemetry setting screen, if you enable the alarm setting on the low rotation side of the RPM sensor and set the alarm setting to 0, an alarm will be activated when the rotation speed becomes 0.

3. Chinese language support
   Added support for Chinese display. You can select Chinese by updating to Chinese version software.

4. GPS display correction
   Fixed an issue where GPS location information could not be recognized correctly.

5. Sub display External input voltage display correction
   Fixed the problem that the voltage was displayed low when the external input voltage of the receiver on the sub-display exceeded 25.5V.

6. KS-01 (O.S.ENGINE)
   Added support for a kill switch KS-01 made by O.S.ENGINE.
